# Description

Opened in June 2013, this signposted walk, which is freely accessible, features 14 panels showing how the village has evolved over the centuries, with different themes: its Gallo-Roman origins, the historic walled village under the protection of the castle, the development of the village outside its fortified walls during the 19th century, the wine-growing village and the wine-grower's garden - these wine-growers spoke the langue d'Oc - and Rustiques as it is today at the beginning of the 21st century.
